DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a polymer.

Group I, claim(s) 9-11, drawn to a polymer composition.

Group III, claim(s) 12-14, drawn to a method of making an etch resist image or solder resist image.

Group IV, claim(s) 15-16, drawn to a laminate comprising the polymer of Group I.

3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The expression special technical features is defined as meaning those technical features that define the contribution which each claimed invention, considered as a whole, makes over the prior art. In the present application, the special technical feature is the reaction product of claim 1. Said technical feature fails to define a "special technical feature" because it fails to define a contribution over the prior art. Specifically, said reaction product is taught in US 5,800,952.

Art Unit: 1773

4. During a telephone conversation with R. Brown on November 4, 2005 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-16 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

6. The Swedish priority document has been received from the International Bureau.

Information Disclosure Statement

7. The information disclosure statement filed 9/27/2004 has been fully considered. An initialed copy of said IDS is enclosed herein.

Specification

8. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented ***on a separate sheet***, apart from any other text.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1773

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by .Urano et al (US 5,800,952).

Urano teaches a photopolymerizable composition for a color filter which comprises a photopolymerization initiator system, a compound having at least one ethylenically unsaturated double bond, a colorant, and a phosphoric (meth)acrylate compound and /or an organic carboxylic anhydride (abstract). The polymer comprises 30-60mol% of a substituted or unsubstituted phenyl such as benzyl methacrylate, 5-30wt% (meth)acrylic acid, and 10-30wt% epoxy (meth)acrylate (col 7, lines 37+) such as glycidyl (meth)acrylate (col 7, lines 28+). The binder has a molecular weight of 1,00-1,000,000, preferably 3,000-200,000 (col 7, lines 63+) and has an acid number of 0.4-4.4mol/kg (col 7, lines 50+).
